Why buy MST?

As you know, there are many various breathing air systems available for a person to choose from. Many of our competitor's supply a quality system but we would like to point out a few key features that make MST stand out above the rest!!

First off, MST carries the **Respiratory Protector Series** that actually removes **CARBON MONOXIDE**. The **Respiratory Protector Series** are available in portable or panel mounted systems. The RP050BMST is the most popular portable system, a 4-stage filter system, rated a 50 SCFM, that contains the LTCat. The LTCat is a Low temperature Catalyst that removes the Carbon Monoxide in your compressed air line. Since dessiccant dryers are not needed, the RP050BMST will provide the worker with safe, comfortable and economical breathing air.

So why buy MST's **Respiratory Protector Series**:

1. Portable 'CO Removal' system available
2. Patented LTCat, that removes Carbon Monoxide
3. Twice the charcoal for taste and odor removal
4. No dessiccant dryers needed, comfortable breathing air
5. Economical - no purge air required for dessiccant
6. 5700 monitor is Intrinsically safe when powered by 9 volt batteries

MST also carries a complete line of **Breathing Air Series** that remove oil, water, tastes, odors and particulate removal. The **Breathing Air Series** are available in portable or panel mounted systems. MST systems have a 4-stage filtration vs. our competitors 3-stage filtration. Which means that MST has at least twice as much charcoal than any one else.

So why buy MST's **Breathing Air Series**:

1. Twice the charcoal than any competitor
2. 4-stage vs. 3-stage filtration
3. 5700 monitor is Intrinsically safe when powered by 9 volt batteries

Above are just a few features that makes MST stand out. Along with a complete line of accessories, customer service is very important to MST, we strive to make you the customer happy. MST has a knowledgeable technical support team to help with any problems that arise.

Should you have any questions, please do not hesitate to contact the factory @ 800-542-6646.
